

Sendai Framework Monitoring

6th Meeting of
Expert Group on Disaster-related Statistics
in Asia and the Pacific
Bangkok, 23-25 April 2019

In support of the Sendai Framework
for Disaster Risk Reduction 2015 - 2030

		Reduce	Increase
7 GLOBAL TARGETS	A	Mortality/ global population 2020-2030 Average << 2005-2015 Average	E
	B	Affected people/ global population 2020-2030 Average << 2005-2015 Average	F
	C	Economic loss/ global GDP 2030 Ratio << 2015 Ratio	G
	D	Damage to critical infrastructure & disruption of basic services 2030 Values << 2015 Values	H
	E	Countries with national & local DRR strategies 2020 Value >> 2015 Value	I
	F	International cooperation to developing countries 2030 Value >> 2015 Value	J
	G	Availability and access to multi-hazard early warning systems & disaster risk information and assessments 2030 Values >> 2015 Values	K

for Disaster Risk Reduction 2015 - 2030

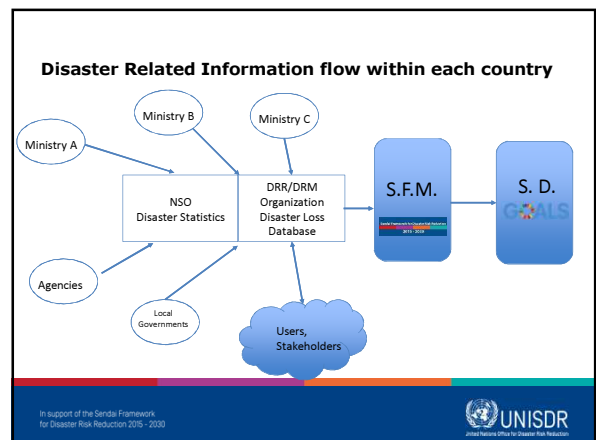

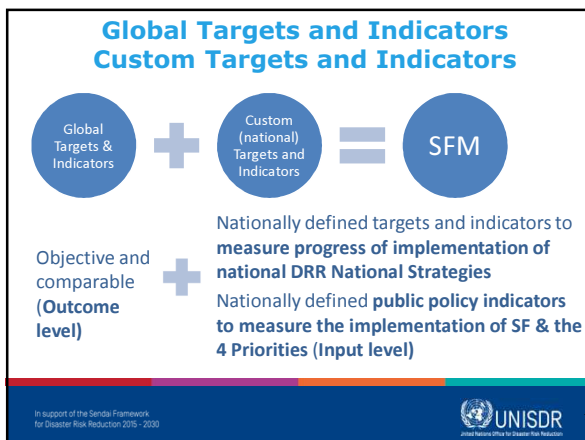

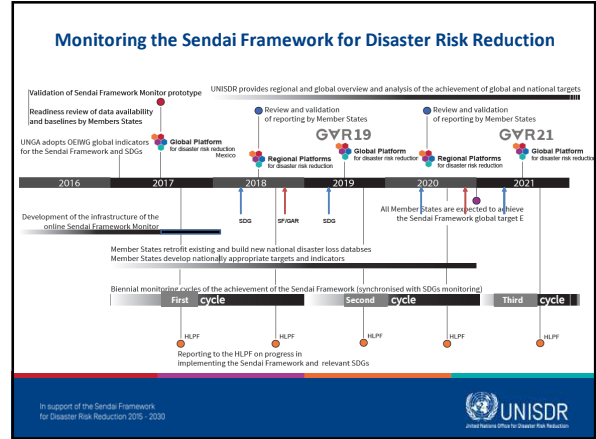

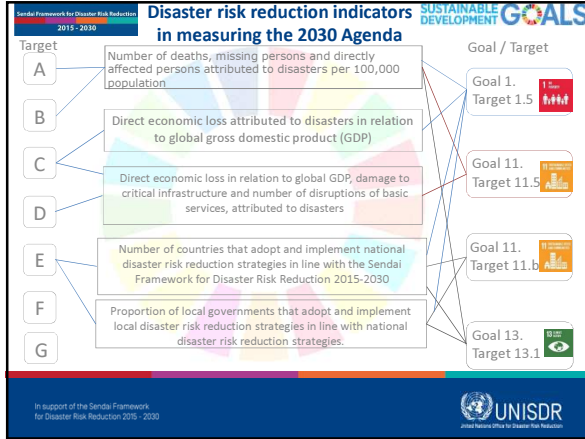

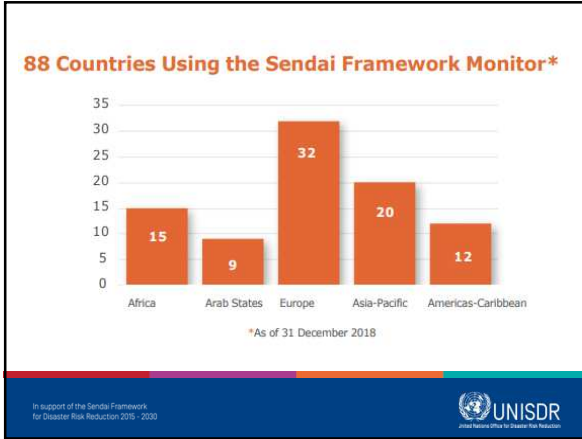

SF paradigmatic shift

- **Proactive attitude:** from disaster management to disaster risk management
- **Preventive focus:** reduce creation of new / reduce existing risk and strengthen resilience
- **Broader in scope:** includes man-made, biological, technological and environmental hazards. Addresses risk of disasters at all scales.
- **Other Frameworks:** Explicit links to the Sustainable Development Agenda, Climate Change and others.

for Disaster Risk Reduction 2015 - 2030

2018 Reporting: Asia Pacific

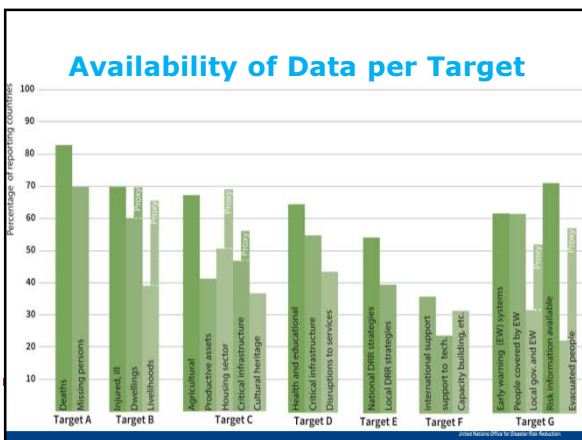

20 Countries in Asia Pacific reported some data online (51%)

- 17 in Asia and 3 in Pacific

Highlights of Data Reported:

- Highest reported was Target A on mortality (100%)
- Lowest reported were Target D on infrastructure losses (37%) and Target F on international cooperation (40%)
- Quality and level of data provided varied

SENDI FRAMEWORK FOR DISASTER RISK REDUCTION

MEASURING IMPLEMENTATION OF THE SENDAI FRAMEWORK

ANNOUNCEMENT: The Sendai Framework Monitor system is now live!

PROGRESS OF GLOBAL TARGETS

COUNTRY REPORTING OVERVIEW

195 countries total	133 not started	62 in progress	0 ready for validation	0 validated
---------------------	-----------------	----------------	------------------------	-------------

TARGET REPORTING OVERVIEW

Target	Category	Not Started	In Progress	Ready for Validation	Validated
A	Mortality	0	195	0	0
B	People affected	158	25	0	0
C	Economic loss	158	36	0	0
D	Critical infrastructure & services	87%	7	0	0
E	Disaster risk reduction strategies	153	32	0	0
F	International cooperation	177	17	0	0
G	Early warning and risk information	88%	25	0	0

Disaggregation of Human losses data							
Issue of disaggregation	To what extent is the disaggregation of data possible by targets (as relevant)						
	A	B	C	D	E	F	G
Hazard	+	+	+	+	n/a	n/a	+
Geography (province, region, municipality etc.)	+	+	+	+	+	n/a	+
Sex	+	+	n/a	n/a	n/a	n/a	n/a
Age (0-14; 15-64; 65+)	+	+	n/a	n/a	n/a	n/a	n/a
Disability (By type of disability)	+	+	n/a	n/a	n/a	n/a	n/a
Income (in relation to national poverty line)	+	+	n/a	n/a	n/a	n/a	n/a

SFM Training

Regional workshops

Initial Regional Workshops conducted targeted NDMOs & National Statistics Offices from member states, and regional organizations.

National workshops

National workshops attempt to include all national partners from Government, and others stakeholders identified by Government such as academic, NGOs and private sector.

Feedback

Feedback and evaluation of workshops has been positive with:

- Advice that countries like the linkages with the SDGs
- Countries like the online reporting links to national DesInventar Damage and Loss Databases

Challenges revealed from Training

Many countries need to establish or enhance internal government mechanisms to better coordinate data collection, data sharing and data reporting.

Examples:

- Unclear who has what data
- No disaggregated data
- Different committees on SDG, Sendai and CC
- Govt Ministries not sharing data (including local level not sharing with national)
- Feeling the data must be perfect before reporting
- Gaps in data collection (not all data needed is collected) (e.g. 84% countries collect Target A – Data Readiness Review 2017)

What Approaches are Working?

- NDMOs are linking with National Statistics Offices to leverage technical support (e.g. established work plans)
- Utilizing SDG or other existing National Committees to assist in Sendai Reporting.
- National coordination workshops -Bringing all relevant Govt partners together to identify who has what data and when they will provide it for reporting purposes.
- E-Learning Platform (UNISDR and ADPC)

Potential Roles of National Statistics Offices in the Sendai Framework Monitoring process

- Support to Coordination and Data Sharing
 - Production of primary data
 - Storage and preservation of data
 - Processing of data and data quality assurance
 - Support, hosting or operation of National disaster loss databases
 - Production of disaster-related statistics
 - Production of climate change-related statistics
 - Geographical information services
 - Provision of data sharing platforms
 - Endorsing data as Official Statistics
- and many more ...

In support of the Sendai Framework
for Disaster Risk Reduction 2015 - 2030

Regional and Global Opportunities:

- UN Statistical Commission's decision to approve a formal mechanism and network of experts to support disaster related statistics
- Dissemination of UNESCAP's Disaster Related Statistics Framework
- UNECE's Task force Report on Role of Official Statistics in Measuring Hazardous Events and Disasters
- Working Group of Member States on Disaster Related Statistics supported by ECLAC and UNISDR

In support of the Sendai Framework
for Disaster Risk Reduction 2015 - 2030

Local Opportunities

- Leveraging support from CSOs in collecting disaggregated data (particularly local data) for national reporting purposes
- Standardizing local collection of data (e.g. templates with minimum data criteria)
- Joint training NSOs and NDMOs
- Establish stronger linkages with National Statistics Offices to assist with disaster data collection practices (e.g. MOUs, secondment of staff during disasters and assisting in online Sendai Reporting).
