

Geospatial Capacity Development Conference on Global Navigation Satellite System (GNSS) applications and Disaster Risk Reduction (DRR)

Dear colleagues,

The [UN-GGIM AP Working Group on Geospatial Information and Services for Disasters](#), in collaboration with the [Geospatial Information Authority of Japan](#) is hosting a virtual conference from **17 January to 20 January** on geospatial capacity development in the areas of GNSS Cross-origin Resource Sharing (CORS) application and DRR.

This conference is for sharing key issues, challenges, best practices and expertise internationally, especially for the Asia-Pacific region among others.

The provisional programme includes the following:

- Keynote Speeches - *Application of GNSS for real-time prediction of geohazards and its transformation to disaster information* and *The Utilization of GNSS for Disaster Risk Reduction Management in Indonesia: Status and Challenges*
- Country perspectives on GNSS and its applications for disaster management and disaster risk reduction
- Q&A sessions

More information is available on the website via this [link](#). To register, please follow this [link](#) and sign up for the conference.
