

2nd UN PET Lab Open House

The Open House for UN PET Lab will be organized on **2 June 2022 at 10.00-11.00 am (New York time)**.

It will focus on the demand for PETs from the statistical community. The UN PET Lab is working under the umbrella of the United Nations Statistical Commission and its focus is therefore on supporting national statistical systems. For the second event we have asked Mr. Omar Seidu of the Ghana Statistical Service and Ms. Aberash Abaye of the Ethiopian Statistics Service to talk about the practical instances, when their offices need to consider privacy concerns either in accessing data of third parties or in disseminating micro-data. We want to keep the last 20 minutes for participants to introduce their work in this area. More information and registration can be found at: [UN PET Lab Open House — UN-CEBD](#)

In the first UN PET Lab Open House on 5 May 2022 we gave an overview of the PET Lab, including the “trade data” use case and the experience of the US Census Bureau participating in this project. Furthermore, we had 11 introductions of those working or interested in working on use cases involving PETs. This showed a wide array of communities, which are involved, such as the statistical community (BPS Indonesia), government (ICO), civil society (the evidence quarter) and private sector (duality technologies, Samsung, SIIA and others). A recording of the first event is available on the same [webpage](#).

A promotional banner for the UN PET Lab Open House. The background is dark blue with a pattern of glowing padlocks in various colors (blue, red, yellow, green). The main title "UN PET Lab Open House" is in large white letters on a blue rectangular background. Below it, the subtitle "Demand for PETs in National Statistical Offices" is in white letters on a teal rectangular background. The date and time "Thursday, 2 June 2022 // 10:00 - 11:00AM (EST)" are in white text. To the left, it says "More information and free registration:" in white. In the center, there is a QR code. To the right, there is a logo for "United Nations BigData" featuring a cloud with colorful dots, and below it, the Twitter handle "@UNBigData" and the URL "https://unstats.un.org/bigdata/".
