## UNESCAP Data Integration Capacity Assessment Survey

Created by Jenine Borowik, last modified by Panita Rattanakittiporn about 10 hours ago

### Instructions for person completing survey

**Welcome to the UNESCAP Data Integration Capacity Assessment Survey.**

This survey aims to collect information from National Statistical Organisations in the Asia and the Pacific, to identify data integration opportunities and challenges.

Results will be used to assess the data integration capacity of national statistical systems in the region, and to inform future capacity building activities by ESCAP and development partners.
